

# Media-based Learning resources

## What type of media-based resources could you use?

- [Videos with experts](#)
- [Instructional videos](#)
- [Case studies and simulations](#)
- [Recordings to encourage reflection on performance](#)
- [Module introductions](#)
- [Revision summaries](#)
- [Videos to encourage discussion or increase engagement](#)
- [Broadcast TV or Radio programmes](#)

## How do you get started?

Within the TEL team, we have Media Advisers for each College to support you to create or source media content that will meet your needs. With years of experience, they are experts in using media to communicate information and are specialists in educational video.

With their support and your subject knowledge, it is possible to produce a unique piece of content for your course, delivering exactly the message that you want to put across.

They can also give advice on how to best deliver this content to students, whether it's for a classroom audience, online via Course Resources, or for viewing on tablets or mobile devices.

To find out about using media to enhance teaching and learning, contact your Media Adviser:
