

Blackboard Adaptive Release Advanced

How to apply adaptive release: Advanced

With “adaptive release: advanced” you can enable more than one route to releasing content This is done by creating multiple rules. Only one of the rules have to be met for the content to be released. Each rule like with standard adaptive release can consist of one or more than one criteria each of which have to be met for the content to be made available. You access the adaptive release through the grey drop arrow that brings up the edit menu

Once you have the menu you open the items we are interested in are highlighted in the red box

Click on “Adaptive Release: Advanced” to open the Adaptive Release: Advanced page.

If you have already set up a standard “Adaptive Release” rule for this item there will already be a rule created this rule will be named “Rule 1”.

Click on the Create Rule button to create a rule.

Create Rule

Give the rule a name

RULE NAME _____

Provide a name for this rule

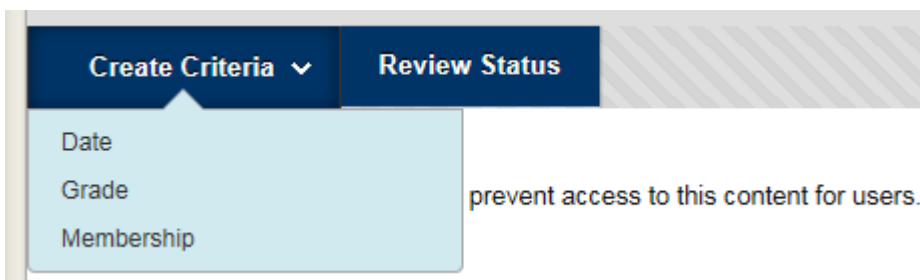

* Rule Name

Rule 1

And click the submit button to go to the Manage Criteria page.

Submit

Now add the criteria for the rule by hovering over “create Criteria” and choosing Date, Grade or membership, or by clicking on the Review Status button.

When you have chosen a criteria it will take you to a page to fill out the criteria. Do this was you would for standard adaptive release (See above). Then click the submit button.

Add more criteria for the rule until you are happy

Content Status: Available

→ Delete

<input type="checkbox"/>	Criteria Type	Description
<input type="checkbox"/>	Membership	1 Groups
<input type="checkbox"/>	AND Date	Display After 02-Feb-2017 15:52

→ Delete

Then click on the Ok button

There is no point in using “Adaptive Release: Advanced” if you are only going to have one rule. You can achieve the same effect with standard “Adaptive Release” so click on the Create Rule button again to create another rule.

Content Status: Available

<input type="checkbox"/>	Rule Name	Criteria
<input type="checkbox"/>	Rule 1	Membership: 1 Groups Date: Display After 02-Feb-2017 15:52
<input type="checkbox"/>	OR Rule 2	Membership: 2 Groups Date: Display After 02-Mar-2017 15:58

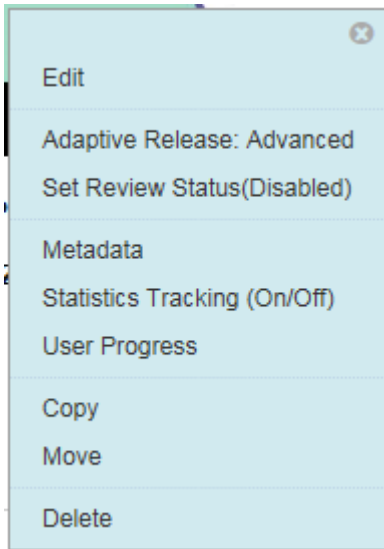

Here we see “Adaptive Release: Advanced” with two rules one rule to release the content to group A on the 2nd of Feb and the other rule to release the content to group B and C on the 2nd of March.

Note: where it says “Membership 1 Groups” this means the membership contains 1 group it is not a group called “1 Groups”

When you are happy you have set up all the rules click on the Ok button and your rule will be set

Once you have applied “Adaptive Release: Advanced” rule you will notice you no longer have the option to create standard “Adaptive Release” rules.

You will not get the standard “Adaptive Release” option so long as you have more than one rule in “Adaptive Release: Advanced”.

If you have set up standard “Adaptive Release” and you open “Adaptive Release: Advanced” you will notice there is already one rule set up.
