

Grade Centre

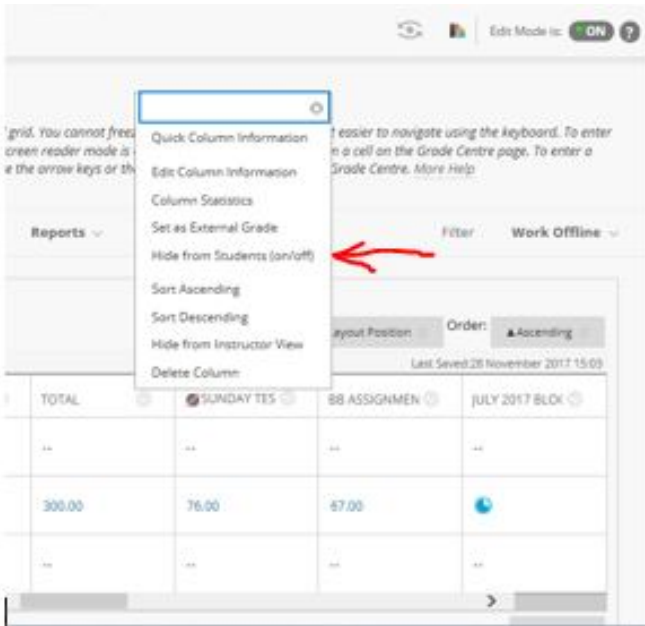

How to hide a Grade Centre column

If you are not ready for the students to see the results yet in Grade Centre, you can hide the relevant column.

From the Module Management Menu in Course Resources, click on **Grade Centre** and then **Full Grade Centre**

From the column you want to hide, click on the drop down arrow in front of the title e.g. Assessment 1, or Total, then from the pop up menu, click on **Hide from Students (On/Off)**. To make the results visible to students, just click again on the same link as it toggles between On and Off.

A red line will appear across a black circle next to the title of the hidden column. If the column is not hidden this will not be showing.
