

Record on Android / iPad / iPhone

How to record using the apps for Android and iPad

iPad

You can record the camera (audio and video), but not any other apps like powerpoint or the screen.

You can also join a session started from a PC or Mac which means the iPad will be an extra audio/video source for the Panopto recording.

[Instructions for using the iPad app are here.](#)

Android

The Android app is limited to uploading existing video files taken with a camera app. You can also view Panopto recordings through the app.

[Instructions on using the Android app are here.](#)

Derby's Panopto server is <https://derby.cloud.panopto.eu>

For more help on using the app please contact IT help desk on 01332 591234 or email itservicecentre@derby.ac.uk.
