

Structured Approach

Structured Approach

Using PebblePad in a structured way means you will be giving students a portfolio to fill in and complete. You will be giving them instructions of what evidence they need to provide and/or asking them questions that they will need to give answers to within their portfolio.

An example of what this might look like, is the [BSc \(Hons\) Nursing Portfolio](#)

There are two elements within PebblePad that will enable you to take this structured approach, **workbooks** and **templates**. A workbook is made up of lots of 'pages' that students need to complete. A template is a single 'page' or form that a student may need to use frequently to record information or use to aid reflection.

Templates

[Click here for information about templates, how to use the PebblePad templates, how to build your own templates and use them with your students](#)

Workbooks

[Click here for information about workbooks and how to build them](#)

Next steps

Set up an ATLAS workspace for students workbooks to be automatically submitted to

Add your workbook and/or templates to Resources on the workspace within ATLAS

[Ensure you have provided a link for PebblePad for your students on Course](#)
