

# Creating short Panopto recording from your mobile device

You can create a recording using Panopto. For guidance on using Panopto please [click here](#). Panopto can be used on a desktop, laptop or even on your phone through the Panopto app.

The short recordings should be an introduction to the concepts covered or a summary of key points.

To create a recording on your mobile device you:

1. Record your video using your camera on your phone. [Tips for filming on your mobile device](#).
2. Download the Panopto app. [For visuals of using the Panopto app](#).
3. Sign in; select 'Enter URL' in the top right and enter [derby.cloud.panopto.eu](https://derby.cloud.panopto.eu) (This will link to the University of Derby login and sign in with your details).
4. Select the burger menu (the three lines) on the top left.

5. Click the 'Record & upload'.
6. Choose the folder (Usually the module) you want the recording to go into.
7. Click 'Choose a Video'.
8. Select the video you have recorded and want to upload.
9. Click the 'Upload' button for the video to appear in the chosen folder.
